Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-17, drawn to a method and device for producing a yarn.

Group II, claims 18-20, drawn to a textile yarn.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I includes the special technical feature of subjecting a yarn to abrasive surface processing while it is undergoing stretching. Group I consists of a method and device which share this special technical feature. Group II is drawn to a textile yarn, the special technical feature being that the filaments are broken by mechanical processing. Group II does not require any abrasive treatment or stretching. Thus, Group I and II lack the same special technical features and do not relate to a single general inventive concept.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
